

REGISTERED APPRENTICESHIP

A proven way for employers to build sustainable pipelines of skilled, talent with their local Cisco Networking Academy.

DO YOU HIRE...

- > IT Support / Help Desk Technicians?
- > Cybersecurity Support Technicians?
- > Network Technicians?

Your local Cisco Networking Academy can help you build a stronger, more skilled talent pipeline through Registered Apprenticeship.

WHY APPRENTICESHIP

Registered Apprenticeship (RA) is the most time-tested, successful model of building your workforce. According to the U.S. Department of Labor (DOL), **employers with RA programs note four significant benefits:**

- 1. Positive financial ROI** – employers report approximately \$1.44 return for every \$1 invested in the program.
- 2. Increased employee loyalty** – employers report lowered turnover, resulting in lower costs associated with constant recruiting, hiring, and onboarding costs.
- 3. Improved worker productivity** – because employees are trained to your systems, procedures, policies, and processes from the start.
- 4. Improved train-to-full-time hiring rate** – apprentices are converted at nearly twice the rate of interns for full-time, post-apprenticeship employment.

In fact, **92%** of employers with RA programs recommend them as an effective workforce development strategy.

FOR CISCO NETWORKING ACADEMY
INDUSTRY PARTNERS

Companies
report earning
\$1.44 ROI

for every \$1 invested in
Registered Apprenticeship.
